Professional Experience

2025

Tallin, Estonia (Remote)

IT Project Manager & Solution Architect

Blackwall [🌐](#)

Driving strategic IT initiatives that strengthen organizational security posture and expand market capabilities. Expertise in solution architecture, API development, security compliance frameworks, and enterprise system integration. Demonstrated ability to lead complex, cross-functional projects from conception through delivery, aligning technical solutions with business objectives while managing stakeholder expectations and ensuring successful outcomes.

Key Accomplishments:

- **Leading the organization-wide ISO 27001 compliance certification program**, managing cross-functional teams to establish comprehensive information security management systems, policies, and control frameworks aligned with international standards
- **Managing the strategic CloudBlue marketplace integration project**, overseeing the architectural design and development of custom APIs to transform existing infrastructure into a fully automated SaaS solution with seamless client workflow integration
- Orchestrated multi-stakeholder initiatives with complex dependencies, implementing robust project management methodologies to deliver on timeline, scope, and budget

2024/01 – 2025/03

Klagenfurt, Austria

IT & Security Administrator - Project Manager

Red Jobs GmbH

Proven track record of successfully managing, maintaining, and securing complex IT infrastructures while leading strategic projects from inception to completion. Expertise in all aspects of IT administration, including server administration, network management, cybersecurity, and user support. Demonstrated ability to proactively identify and resolve technical issues, implement security best practices, and ensure optimal system performance and availability. Strong project management capabilities with experience orchestrating multi-stakeholder initiatives and driving digital transformation.

Key Accomplishments:

- Successfully implemented and maintained a robust cybersecurity framework, significantly reducing the risk of data breaches and cyberattacks
- **Led end-to-end project management for an advanced e-commerce platform development and integration**, coordinating technical teams and stakeholders to deliver a comprehensive solution on time and within scope
- **Initiated and managed an Agentic AI implementation project** to optimize internal company processes, identifying automation opportunities and driving operational efficiency improvements
- Streamlined IT operations through the automation of routine tasks, resulting in increased efficiency and reduced operational costs

2020/09 – 2023/12

Klagenfurt, Austria

Product Manager

Onda TLC GmbH

Description

Expertise in all aspects of product management, from ideation and planning to launch and support. Strong business development skills, including the ability to identify and qualify leads, develop and deliver presentations, and negotiate contracts.

Highly technical and professional experience in the telecommunications industry, with a proven track record of success in bringing new products and services to market, and in developing and executing strategic business plans.

Deep understanding of the telecommunications market and landscape, as well as the latest technologies and trends.

Key Accomplishments

Led the development and launch of a new telecommunications product that generated over \$10 million in revenue in its first year.

Successfully secured a \$5 million contract with a major telecommunications provider.

Managed a team of engineers and product designers to develop and launch a new telecommunications service on time and within budget.
Presented at numerous industry events and conferences on the latest telecommunications technologies and trends.

2021/01 – 2021/09
Klagenfurt, Austria

5G Data Cloud Fog Computing Research Project Participant

Universität Klagenfurt · Part-time

Contributed to projects exploring the intersection of 5G, cloud, and edge computing. This involved developing and evaluating novel architectures and algorithms for data processing and distribution in 5G networks as well as related integration with cloud native architectures and services on different service provider and opensource selfhosted solutions
